

Thinkboard Cards

		
		
<p>I have one 20c piece and two 10c pieces. Altogether I have 40c.</p>	<p>I had eight counters and added two more counters and now I have ten counters.</p>	<p>I have two bundles of 10 and 3 ones. That is twenty three.</p>
<p>I added two to five and got seven.</p>	<p>There is one chance in six of getting a two.</p>	<p>When we measured our heights Lucy was the tallest and Harper was the shortest.</p>
$20c + 10c + 10c = 40c$	$8 + 2 = 10$	$10 + 10 + 3 = 23$
$5 + 2 = 7$	$P(2) = \frac{1}{6}$	$\text{Lucy} > \text{Harper}$
