

ASSESSMENT OPPORTUNITIES

TEACHING MATHEMATICS THROUGH STORY BOOKS (F - 1)

Teachers of young students are good observers of behaviour. For example, several activities in this book involve counting so teachers might observe and record whether students:

- know the counting numbers in the correct order.
- follow a one-to-one correspondence when counting objects, that is attach a number name to each object - no double ups or missed objects.
- appreciate that the last name said represents the whole set.

In addition to providing "what to look for" assessment options we have included some reproducible sheets that may be used to collect work samples. See below.

WE'RE GOING ON A BEAR HUNT by Michael Rosen

NAME: _____

DESCRIPTION
"One shiny wet nose! Two big furry ears! Two big googly eyes!"

QUESTIONS
How many noses are there? _____
How many ears are there? _____
How many eyes are there? _____
